Town's Role in Resilient Caledon Plan Implementation	Action Taken	Description
Leadership	Corporate Green Building Standard (2021) (CGBS)	Updated the Town's CGBS (2021) to require all new eligible Town-owned buildings to have rooftop solar energy and align with net zero ready buildings by 2030.
	Corporate Green Fleet Strategy (2021)	Established the first Corporate Green Fleet Strategy (2021) to outline a plan to replace fleet at the end of lifecycle with feasible lower carbon alternatives.
	Green Development Standards (2022)	Hired a consultant to support the development of the Town's first Green Development Standard, to embed climate change and environmental policies into all new development.
	Bolton Community Improvement Plan (2021)	Updated the Bolton CIP to include an aggressive energy and carbon reduction grant program to reduce eligible business operating emissions.
	Green Fund Program Revamp (2022)	Updating the Town's Green Fund program to support schools and community groups to implement projects that are aligned with the Resilient Caledon Plan.
	Corporate Energy Team & Energy Revolving Fund (Established 2015)	In 2015, Council approved the establishment of a Corporate Energy Revolving Fund (CER Fund) to support the Corporate Energy Team implement energy conservation projects that align with the Town's Corporate Greenhouse Gas Reduction Framework.
Foster Collaboration	Centre for Community Energy Transformation	Town has been participating in an advisory committee for a non-profit organization, established by the City of Brampton to accelerate community action on climate action in the areas of home energy retrofits, industrial/commercial/institutional efficiency and district energy. Staff will be exploring a Service Level Agreement for the organization to support climate action in Caledon.
	Peel Climate Change Partnership	Comprised of the Cities of Mississauga and Brampton, Town of Caledon and Credit Valley and Toronto Region Conservation Authorities, the partnership focuses on promoting low carbon

Schedule A to Existing Programs, Partnerships and Monitoring and Evaluation

Town's Role in Resilient Caledon Plan Implementation	Action Taken	Description
Foster Collaboration		communities and green (natural) infrastructure and enhancing flood resiliency. Each Partnership member will be bringing forward the Region-wide Zero Emissions Vehicle Strategy forward to their Councils for approval in June.
	Green Biz Caledon	Partnering with Partners in Project Green, this program focuses on supporting existing businesses in Caledon to reduce their operational footprint, focusing on waste reduction, water and energy conservation and low carbon transportation.
	West Bolton Sustainable Neighbourhood Action Program (SNAP)	In partnership with TRCA, the SNAP focuses on partnering with the community and agency stakeholders to enhance public spaces, improve sustainable transportation connectivity, reduce emissions and adapt to climate change.
	Peel Home Energy Retrofit Program	The Town of Caledon, Cities of Brampton and Mississauga are collaborating to design a Peel home energy retrofit program that will support residents that are interested in improving the energy efficiency and reducing the carbon footprint of their homes.
Monitoring and Reporting	Facility Energy Models	Energy and Environment staff have created statistical energy models of all Town facilities, using a Federal Government software, RETScreen Expert, to track progress of the Town's corporate energy program.
	Annual Provincial Energy and Emissions Reporting	As required by <i>Electricity Act, 1998, Ontario Regulation 507/18</i> , the Town reports annually to Council and the Province facility emissions and energy consumption.
	Greenhouse Gas Emissions Inventory Tool	Energy and Environment Staff in partnership with a consultant, created a tool to annually track community greenhouse gas emissions. Staff are working on hiring an additional headcount to provide leadership on this process.
