Re: ICBL 2022-075

Caledon Town Council;

It's my opinion that the Caledon Town Council must re-new ICBL 2022-075 for another year to allow further study of the adverse effect of the proposed quarry on the:

- water table and watershed
- quality of water of Credit River
- traffic safety and increased volume
- natural habitat.
- health and safety of Caledon residents in the surrounding area.

With Concern.

Susan Mohos
