# Wait, who are these kids?

- We're a team of youth from Mississauga, passionate about bringing GDS to cities since 2021
- **Buildings are the leading cause of emissions at 52%. But GDS can change that!**

us last year!

1200 signatures, 2 council deputations  
and dozens of meetings later...

## Update

On April 8, 2024 the City's **Planning and Development Committee** unanimously approved the new Green Development Standards. In case you missed it, the report and recording of the presentation are available [here](#).

This is an important step towards achieving a greener, more sustainable future for our City.

## Why are we here?

- GDS is one of the most **impactful** climate policies a city can pass – and **you can make it happen.**
- Caledon developments are set to triple by 2050 – let's make sure developments are future-proof before then!

- We agree that we **shouldn't fall behind** on climate leadership in the GTA

- We agree that we **shouldn't fall behind** on climate leadership in the GTA
- We need **concrete action** on climate in the city - literally.

- We agree that we **shouldn't fall behind** on climate leadership in the GTA

- We need **concrete action** on climate in the city - literally.

- Young people want to live here!

*(We can't keep going to Toronto!)*

- We both want to see more youth care about what happens in the city
- Young people should play a crucial part in the search for solutions and be present in a way that **doesn't just tick a box**
- We want to see Caledon grow **affordably** and **sustainably**

**New Majority at the Amazing Green Race**

**Even though climate change is a huge global issue, you don't need to be an esteemed researcher to help.**

**You just have to raise your voice.**

**GDS IS A
