Subject: Road Safety and Illegal truck yards

Good morning,

As a resident of Caledon east and being on the road a lot because I am a contractor. I see so many traffic infractions from over sized vehicles on our sideroads after hours to illegal u turns with over sized vehicles. This is all due to illegal truck yards tucked away in our sideroads on Agriculture land. Do you know the impact this has on our natural resources. I'm sure the Ministry of natural resources would love this. These truck yards have owner operators change oil on the spot and dump the oil right on the ground I have been told. We need to put an end to this and get rid of these depots. Also I have farmers as customers saying they are looking to move their farms because of these illegal truck yards because they are scared their water sources may get contaminated. The Town of Caledon one day may have another Walkerton on their hands and trust me we don't need that. Our streams host Salmon Spawning and are in jeopardy from these illegal truck yards. Safety on our roads are becoming diminished with all the vehicle accidents and deaths of our community residents.

PLEASE HELP!!!

Regards

John
